

3-STAGE EXTENDABLE CONVEYOR

Accelerate high volume load and unload of larger-size packages.

Engineered for more robust parcel load and unload, this belted conveyor easily extends into trailers, trucks or other transport vehicles, to increase the speed of product transfer operations at the door. The 3-stage design provides more reliable tracking of the boom and belt, while also reducing overall maintenance. The conveyor unit is ground mounted, increasing stability and durability, and a heavy-duty boom absorbs increased weight of packages. Articulating boom extension can be raised or lowered to accommodate package wall elevation changes, as well as stowed upright* to improve workflow at the door.

*Conveyor must be in fully retracted state

KEY FEATURES

1. In fully retracted state, boom extension can be stowed upright for improved workflow at the door
2. Wide 29 in. belt width to easily transport larger packages
3. Variable speed belt for unload operation
4. Lights underneath and on front of boom illuminate work area within trailers for increased safety
5. Removable slider bed and base unit ports provide easy access for maintenance operations
6. 3-stage boom extends up to 53 ft. 9 in. to work comfortably throughout length of vehicle

OPTIONS

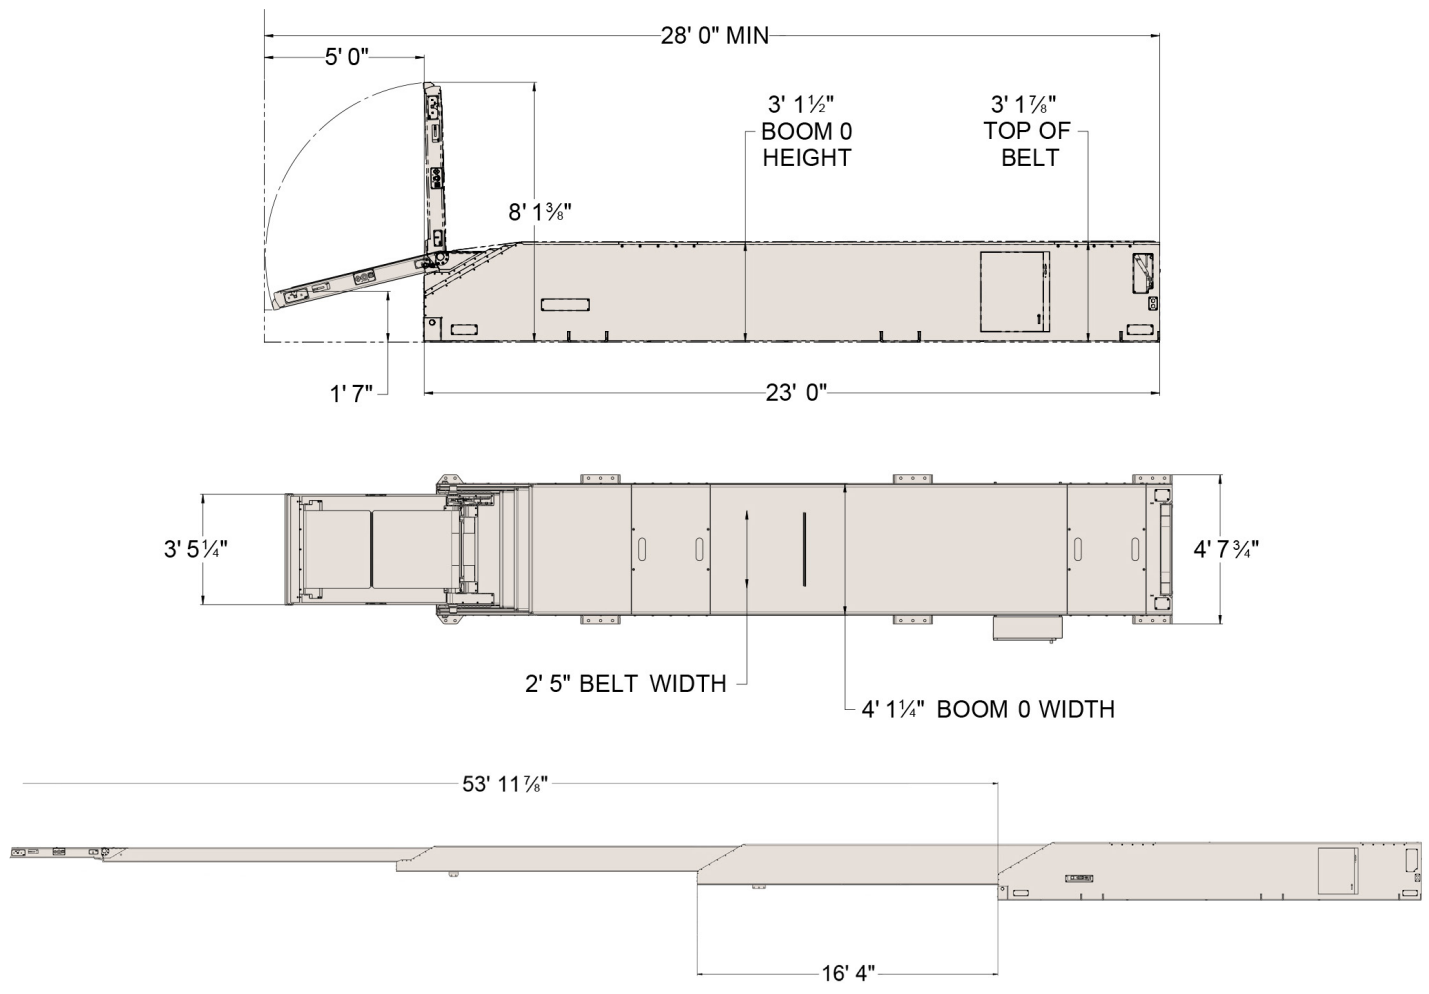

- Electrical enclosure can be mounted on right-hand or left-hand side depending on application
- Raised Belt Top (RBT) kit
