

INVERTED CASTER BED CONTAINER DOLLY

Versatile configuration to handle more.

Get value-priced versatility in this new and innovative dolly that handles all standard container base sizes to 61.5 in. x 60.4 in (156 x 153 cm). It's our same high quality at a value price for the absolute lowest total cost of ownership.

For efficient logistics, stack as many as five dollies for shipping and roll them onto a transport vehicle without crating for fast, inexpensive shipping. The robust design features eight wheels coupled with the heavy-duty frame construction that easily handle loads as heavy as 15,000 lbs. (6,804 kg), while a durable steel frame and strong welds withstand hard use and abuse. To further enhance operational efficiency, forklift tineways make cargo movement easy. The construction quality is reinforced by high-quality, Grade 5 zinc hardware that's smartly incorporated into the innovative design, ensuring the dolly resists corrosion and holds up for years. Finally, U.S. military-grade powder-coated finishes in custom color choices keep the dollies looking new even after extended use.

KEY FEATURES

1. Pallet stops secure containers in place
2. Sealed bearings minimize maintenance and maximize longevity
3. High-quality, top grade Zinc hardware resists corrosion
4. Double Ackerman steering for better tracking and in-line towing
5. Towbar activated front-wheel brakes for increased safety

OPTIONS

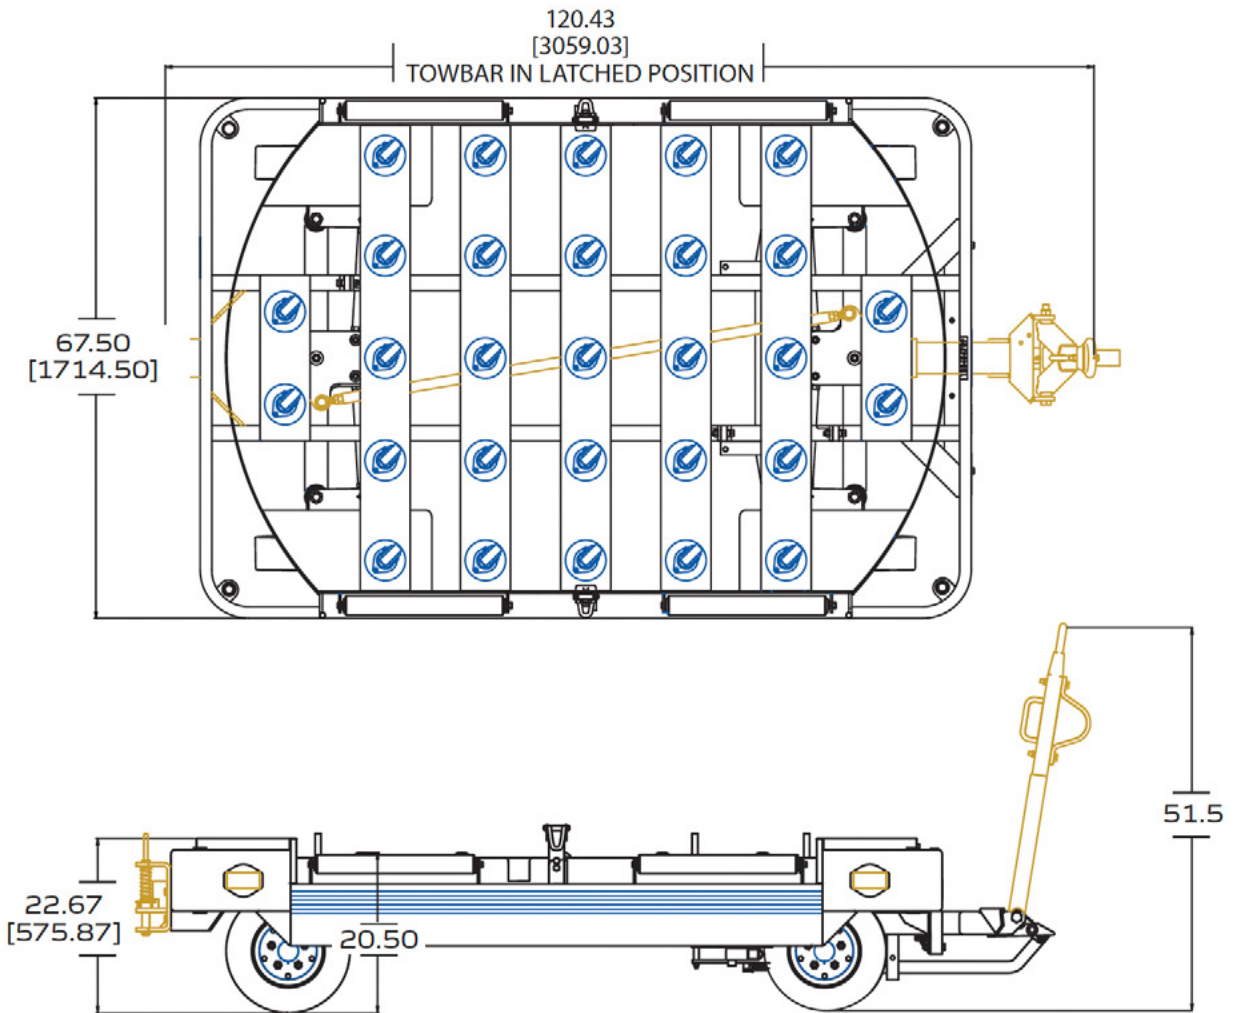

- Optional hot-dip galvanizing gives additional corrosion resistance
- Bolt-on tineways
- Towbar hold-up
- Toe guard
