

SINGLE-STAGE EXTENDABLE CONVEYOR

Maximize package transfer rates for ULDs.

Belt-drive conveyor for operations with more limited load/unload space and shorter reach requirements, designed to bridge the gap from dock to trailer or other vehicles and accelerate package transfer rates. Manual extension/retraction allows boom to stop in position at any length, up to a max of 6 ft. 6 in. to reach inside container for ease of operation. Hydraulic work height adjustment raises or lowers boom extension to align with package elevation changes for increased performance and operator safety.

KEY FEATURES

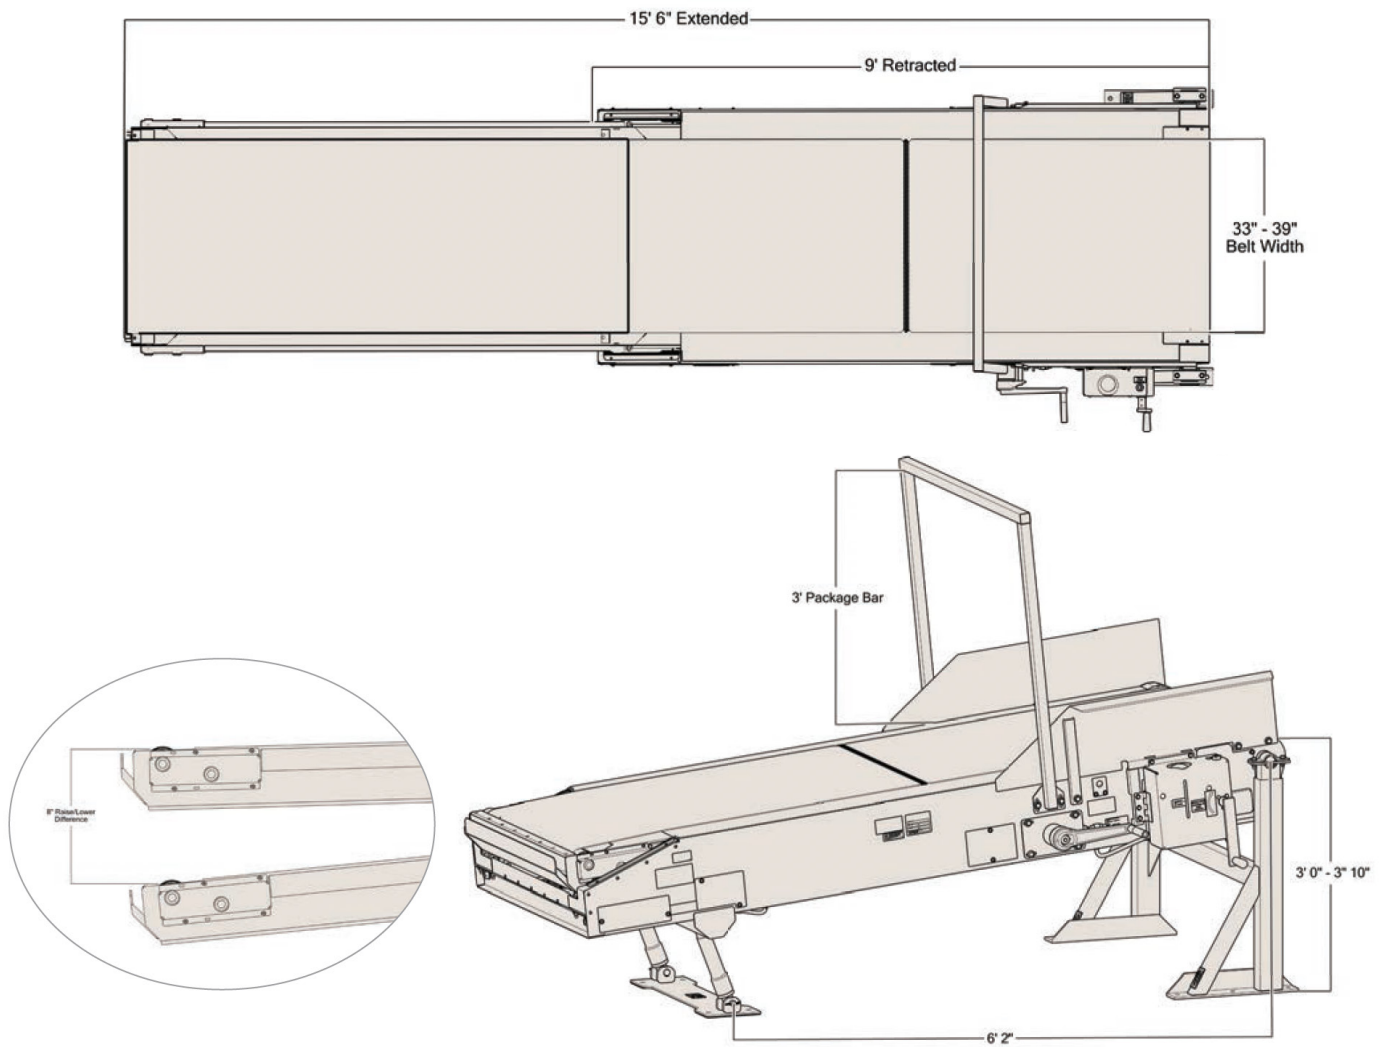

1. Belt width: 33–39 in.
2. Manual/hydraulic work height adjustment
3. Extendable from 9 ft. up to 15 ft. 6 in.
